Summary

Data Analytics student with hands-on experience in Python, SQL, and real-world data projects. Skilled in analysis, visualization, and building practical solutions that extract meaningful insights.

Technical Skills

- **Programming:** Python, JavaScript
- **Web Development:** HTML, CSS, Responsive Design, API Integration
- **Data Analysis:** Pandas, NumPy, Matplotlib, Seaborn
- **Databases:** SQL (MySQL)
- **Tools:** Jupyter Notebook, Google Colab, VS Code, Excel, PowerBI

Projects

Netflix Data Analysis :

- Processed 8,800+ records using Pandas with cleaning and validation for accurate global analysis
- Found TV shows reached 34% of new content by 2021 and visualized trends across 10+ categories

Weather Web App :

- Built responsive app using HTML, CSS, JS with live API for real-time weather data
- Implemented dynamic UI updates and error handling for invalid inputs and network failures

Blinkit Grocery Insights :

- Built KPI dashboard analyzing sales, ratings, and item count to identify top products
- Evaluated yearly and regional trends to uncover growth patterns and expansion insights

Education

B.E. Computer Engineering	2022–2026
Anantrao Pawar College of Engineering, Pune	CGPA:
8.20	
Class 12	2022
Wani Public School	70.33%
Class 10	2020
Lions English Medium School	92.20%

Certifications

- Python Programming : Internshala
- Web Development : Codehelp

Achievements

- Published paper on Fake Review Detection
- Published paper on AR Furniture Placement App
- Smart India Hackathon (SIH) internal round finalist. Our team was selected in the college level internal round.
